

MANAGEMENT

Applications of Light and Energy Management

O. N. Awasthi

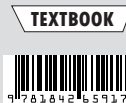

FORTHCOMING

APPLICATIONS OF LIGHT AND ENERGY MANAGEMENT is a comprehensive guide to the theory and practice of lighting design covering the visual and biological effects of light, lighting applications and exterior lighting with application in defence and warfare, medical and healthcare as well as applications for exterior spaces, namely, road lighting, automotive lighting, sports lighting, underwater lighting, tunnel lighting and flood lighting, etc. It also contains material for energy audit and lighting economics alongwith a chapter on lighting control technology. The book is suitable both as a textbook and as a handy practical guide for practicing lighting engineers.

This is a companion volume to *Fundamentals of Lighting Design*.

Audience: Under-Postgraduate Students, Professionals, Researchers and Industry

E-Commerce

S. K. Mourya, Shalu Gupta

E-COMMERCE is an effort to describe business methodologies that address the needs of organizations, merchants, and consumers to cut costs while improving the quality of goods and services and increasing the speed of service delivery. By using Internet and understanding how Internet has blurred the line between e-commerce and traditional commerce, more businesses start and continue to integrate the Internet and e-commerce related technologies into their business processes leading to improved organizational performance. Adopting EDI, EPS, VPN and M-Commerce has lead to global market exposure, increasing profitability, gaining market share, improving customer service and faster delivery.

Transforming Business Organisations for Longevity **NEW** *Challenges and Opportunities*

Editors: *S. S. Bhakar, T. S. Sikarwar, K. K. Yadav, Aashish Mehra*

TRANSFORMING BUSINESS ORGANISATIONS FOR LOGEVITY: Challenges and Opportunities has been organized to cover innovations and transformation of organizations on functional basis. The book has been divided into five sections. The first section includes research papers on innovation in financial management. The second section includes research papers on innovations in General Management and transformational effects of improved operations and production practices followed by the third section on innovating Human Resource Management for organizational transformation and survival. The fourth section deals with Marketing Management innovations that support and facilitate organizational transformation and survival. The fifth section contains chapters on application of IT in transforming Management to transform organizations for improving their longevity.

Audience: Postgraduate Students, Librarians, Teachers and Researchers
